

A Vision for Clean Water

“THINK TANK” FOR THOSE INTERESTED IN WASH PROJECTS WORLDWIDE TO BE HELD IN CLARKSTON, MI

As part of a Rotary District 6380 Grant, A Vision for Clean Water is hosting a **“Think Tank”** to discuss ways to increase long-term success for water, sanitation and hygiene projects. It will be held the day following the 3-day Latrine Workshop (<https://avisionforcleanwater.org/latrines-2019>) to allow the workshop attendees who have come from Kenya, Ecuador and Haiti plus others to participate. **Please help us by passing the word to local WASH implementers.**

When: April 29, 8:30 AM to 5 PM, includes lunch

Where: Colombiere Retreat Center, 9075 Big Lake Rd, Clarkston, MI 48346

Cost: No charge but you must RSVP. Space is limited.

Facilitated by: AVFCW Board Member Nikki Beetsch

(Principal Research Investigator, NSF.org/ Technical Project Manager Secondee, WHO.org)

The Think Tank will bring together stakeholders (implementers, funder, end-users and educators) to share their experience on the different elements of a project – such as technology selection, community engagement, identifying priorities, budget, available tools, and what sets a project up for success or failure. And, importantly, how to define success or failure. The exchange of experience and thoughts will question the value of a Water Safety Plan (WSP) and how WSPs can be applied to all scales of projects.
